The manuscript entitled "The Choice of Breeding Objectives and Selection Criteria Decided by Breeders of Various Goat Breeds and Factors Influencing Them" is prepared and presented very well in all sections of the manuscript.

This study can serve as a guide for all the stakeholders in UEA, especially the goat farmers, breeders, and veterinarians. The only problem that I have seen in this manuscript is the period of the study (December 2015 – September 2016), which, after about six or seven years, I do not know how relevant the information can actually be.

In general, my opinion of this manuscript is very positive, and I agree to accept it for publication as it is.
