Potential competing interests: No potential competing interests to declare.

The paper discusses interesting issues on community development from social, economic, and cultural perspectives. However, a lot of information could be added to make it more interesting.

1. How much is the sample data?
2. More discussion on the pilot survey data and process
3. CFA and EFA analysis?
4. More discussion on the full survey data and process
5. Binary regression model used?

Overall, the paper has good potential to be explored further.
