Potential competing interests: No potential competing interests to declare.

The manuscript needs thorough language proofing for grammar mistakes, redundancies, and poor sentence structures. For example, in the intro section: "The seeds of the almond plant are one of the nuts that are a source of high." The sentence structure needs revision. Other mistakes are highlighted in the attached PDF file. The novelty of the work is medium-ranked; previous studies reported on the Yemeni almond total phenolic and total flavonoid contents as the study "Development and Optimization of the Sample Preparation Method to Determine the Antioxidants in the Yemeni Almond."
