Comments on the manuscript- Social Outreach of MFIs

1. **Background:** Well-crafted from the poverty and microfinance social performance perspective. Empirical gap provided.
2. **Literature Review.** Indicate the applicability of reviewed concepts to the current study beyond just describing them, and ensure all literature in the different sections is supported by citations. Also, provide the theoretical foundation of your study.
3. **Results and discussion.** The presentation and discussion are good and supported by extant empirical evidence. However, where there is contradictory evidence to your findings, like the debt equity ratio discussion, you need to take a standpoint to vindicate your findings.
4. Review your citations.
