

Review of: "Examining GITAM (Deemed to be University) and Osmania Universities in Hyderabad for Crime Prevention through Environmental Design measures": A foundation towards a safe CPTED exterior campus model"

Youssef Tliche

Potential competing interests: No potential competing interests to declare.

I commend the author for having taken the comments seriously and undergone a structured revision of their work. However, the sample sizes are still small for me. Nevertheless, since the broadens of the field of knowledge given the potential to broaden the field of knowledge in campuses security in this manuscript is valuable, I think that this new version is more suitable to be published in Qeios.
