

# Review of: "WaveBit — Nonbinary Computation: I Symmetric Cryptography"

Gaurav Verma

Potential competing interests: No potential competing interests to declare.

1. How is the proposed scheme more secure and highly robust to attacks in comparison to other available schemes?

Please justify it.

2. According to the proposed idea, it has 20 references, and therefore, they have to be updated. Please add more recent references to have a robust comparison.

3. The author should focus on a quantitative comparison.

4. The author should discuss more about drawbacks and future opportunities.
