

# Review of: "Technological Unemployment, Skill Mismatch and the Future of Higher Education in Post-Pandemic Nigeria"

Awal Kurnia Putra Nasution

**Potential competing interests:** No potential competing interests to declare.

The title is very relevant and reflects the main theme of the manuscript. This title clearly describes the topic that will be discussed, namely the effects of technological unemployment, skills mismatch, and how this impacts higher education in Nigeria after facing the pandemic. A good title should provide a brief but complete description of what the manuscript is about, and it accomplishes that purpose well.

Even if your abstract is concise enough, you can add a few further sentences to provide a more in-depth description of the research methods used and the main findings. This will help potential readers to better understand the context of your research and the relevance of the findings to be discussed.

Create a section for the research method used.

It is better to separate the findings and discussion sections.
