According to me, this article can be published.

A few grammar/language issues should be sorted out to improve the quality, e.g.,

page 3, line 4; page 3, first sentence in 4th paragraph;

page 3, 4th paragraph, line 10, 'recent years' not 'these years';

page 3, 4th paragraph, line 13, 'intravenously', not 'by injection';

page 4, line 5, 'conditions' not 'condition';

page 4, title of scheme 1 should start with a capital letter and end with 'conditions' not 'condition' and end with a full stop.;

page 4, third paragraph, 'received' not 'prepared';

page 5, line 2, 'to a 10ml round bottom' not 'to 10ml round bottom';

page 6, line 14, 'the effect of the base' not 'the effect of base';

page 6, line 15, 'bases in the reaction' not 'bases in reaction';

page 6, line 19, delete 'the' before 'ethanol';

page 11, the second sentence below Table 4

Also, some spelling errors must be looked at, e.g.,

page 3, line 2, 'ideal' not 'idea';

page 3, line 5, 'synthesised' not 'synthesis';

page 3, line 12, 'heterocyclics', not 'heterocyclic';

page 5, line 2, 'cyclohexanone' not 'cyclohexanon'.

Some other small things like the brackets around the compound numbers shift, for e.g., page 8, and page 9, the '3 and 4' in 'Tables 3 and 4' moved over 'Tables' in the text, and page 12 'Figure 3' moved over 'shown in' in the text. The 3 in Et<sub>4</sub>N in Table 2's picture should be subscript.
