Seizures-intellectual disability due to hydroxylysineuria syndrome

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Seizures-intellectual disability due to hydroxylysineuria syndrome. ORPHA:79156*

Seizures-intellectual disability due to hydroxylysineuria syndrome is characterised by hydroxylysineuria, myoclonic and motor seizures and intellectual deficit. It has been described in a brother and sister born to consanguineous parents and in one unrelated patient.
