Potential competing interests: No potential competing interests to declare.

Minor Correction: Please update the data, As the reports, more than 508 million cases and about 6.21 million deaths were caused by this disease until May 2022.

After a thorough review process, it was observed that your article provides a valuable contribution to the field of sarcopenia and its implications within the context of COVID-19. Your comprehensive review presents a well-structured and organized body of knowledge, addressing the challenges faced by individuals affected by both sarcopenia and COVID-19.

The in-depth research and analysis you have conducted have been highly appreciated. By integrating current studies and evidence-based information, you have created a reliable resource for readers seeking a holistic understanding of sarcopenia and its management during and after COVID-19. Your emphasis on basic and nutritional interventions, spanning both hospital and home settings, ensures a comprehensive approach to combating sarcopenia in this unique context.

Your manuscript showcases the hard work and dedication you have invested in this topic, and I'm confident that it will be well-received by the scientific community. I believe that your findings and insights will contribute to advancing knowledge and understanding in the field, ultimately improving the care and outcomes of individuals affected by sarcopenia during the COVID-19 pandemic.

Best regards,

Md Sadique Hussain
