1. Sex, Sex Roles, and Gender

Start the text by providing a clearer introduction that briefly explains the topic of gender transition and the medical model's role in understanding it. This will help set the context for the subsequent discussion.

While the text briefly mentions individuals with BID, it may be helpful to provide more background information about this condition to ensure readers fully understand the comparison being made between BID and transgender experiences.

Some sentences are complex and may be challenging to follow. Aim for clarity and simplicity in your language to make the text more accessible to readers.

4. Revisioning Sex and Ending Gender

To improve the article "Revisioning Sex and Ending Gender," I suggest organizing the content into clear sections, using concise language, and presenting arguments with more clarity. Additionally, providing more context and explanations for certain points would enhance the overall understanding.
