Potential competing interests: No potential competing interests to declare.

I have gone through the review paper. The review is well prepared. But there is a need for some improvement, which is listed below.

## The Biodetoxification and Pretreatment with Dry Acid

Divide this section with a different type of acid by percentage.

## Valorization of Bagasse

The enzymes and types of enzymes, as well as the percentage, are missing.

## Microbes-based LA Production

This portion should need more improvement because it is the title theme of the review paper.
