Pheochromocytoma and Paraganglioma TNM Finding v8

National Cancer Institute

Source

National Cancer Institute. *Pheochromocytoma and Paraganglioma TNM Finding v8*. NCI Thesaurus. Code C141105.

A finding about one or more characteristics of pheochromocytoma and paraganglioma, following the rules of the TNM AJCC v8 classification system. This classification system applies to the adrenal medulla pheochromocytomas and sympathetic paragangliomas. Parasympathetic paragangliomas are not staged because they are largely benign. This staging system does not apply to neuroendocrine tumors of the pancreas (are staged according to the classification for neuroendocrine tumors of the pancreas) and carotid body tumors (not staged). (from AJCC 8th Ed.)
