**Potential competing interests:** No potential competing interests to declare.

The manuscript titled, "Pros and Cons of Key Escrow Agreements in Cloud" was highly informative and had offered valuable informations about the agreemtents in the cloud computing. However a minor level of modifications/queries may be addressed.

1. A study on recent works in this domain may be considered and the updation in your work with respect to the existing work may be highlighted.
2. Illustration is required on "how to the key (K) is generated?"
3. Detailed illustration is required on "what is skipjack unit key?"
4. Security analysis is to be done to prove the security of the data communication.
5. Conclusion is to be reframed with the highlights of the manuscript/work
