Global Partial Response

National Cancer Institute

Source

National Cancer Institute. *Global Partial Response*. NCI Thesaurus. Code C159947.

Regression of measurable disease with complete response in skin and nodes, blood and viscera categories not having complete response or noninvolvement and where no category has progressive disease. Partial response is also assigned when there is partial response in skin and no nodes, blood and viscera category has a progressive disease and if any category involved at baseline at least one has a complete or partial response.
