Drug Synthesis and Chemistry Branch

National Cancer Institute

Source

National Cancer Institute. *Drug Synthesis and Chemistry Branch*. NCI Thesaurus. Code C16054.

A branch of the Developmental Therapeutics Program of the National Cancer Institute. It is responsible for activities that support the discovery and development of novel anti-cancer agents, including management of the storage, inventory, documentation, and distribution of samples for research purposes; and synthesis of cold and radiolabelled compounds for in vivo studies and anti-angiogenesis standards.
