Potential competing interests: No potential competing interests to declare.

1. This study only proposes and verifies one hypothesis, and its model content and structure are too simple. It's recommended that the authors conduct in-depth thinking and analysis on the research questions of this article, further refine the research issues, and conduct deeper and more thorough research into its internal structure. In this way, the relevant mechanisms can be better revealed and the academic value of this study can be further enhanced.
2. The abstract does not adequately pave the way for the research ideas and content of this article. In other words, after summarizing the problem, its causes should be further analyzed, and then improved research ideas and methods should be proposed in a targeted manner.
3. As the background and origin of this study, the "Introduction" part can be introduced more fully.
4. The advancement and operability of the research methods used affect the objectivity and progress of a research results/conclusions. At this point, the "Methodology" part of this article still has a lot of space for further improvement.
