The topic of the research is very important and interesting. However, there are many comments e.g.:

1. English editing is mandatorily needed.
2. The abstract lacks many important data and must be rewritten.
3. Ethical animal guidelines not mentioned.
4. The used animal was bought from a local market???? What about age- sex- weight?? And how you confirm that they were free from any infections??
5. The statistical analysis for the data needs more details.
6. You must rearrange the writing of your data.
7. The conclusion needs to be more attractive and conclusive.
