# Dalcetrapib

National Cancer Institute

## Source

National Cancer Institute. *Dalcetrapib*. NCI Thesaurus. Code C81529.

A cholesteryl ester transfer protein (CETP) inhibitor that can produce an increase in serum HDL-cholesterol levels and a decrease in serum LDL-cholesterol levels.

Dalcetrapib is structurally dissimilar from other CETP inhibitors, including torcetrapib, and raises functional HDL by a different mechanism.
