

Review of: "Leveraging Fine-Tuned Large Language Models in Bioinformatics: A Research Perspective"

Kanika Garg

Potential competing interests: No potential competing interests to declare.

The paragraph seems well-written and captures the essence of the topic. However I would like to suggest some minor changes-

Abstract

- Change "This analysis extensively explores" to "This analysis explores extensively" for smoother phrasing.
- Add a comma after "NLP" to separate it from the rest of the sentence.
- Insert commas before and after "among others" to set off the additional information.
- Consider using "addresses" instead of "underscores" to better convey the intent of discussing hurdles.

Applications and Challenges-

- Please refer the appropriate work to support your statements
