This article is a review on ChatGPT prompts, with smooth writing and clear expression, but there is still room for improvement. The author is advised to improve from the following aspects.

1. Increase the extensiveness of research on related papers or websites. It is recommended to add research on the impact of ChatGPT on humans, especially after the emergence of GPT-4, and the effects of multimodal data on humans.
2. It is recommended to increase the research on ChatGPT prompt design schemes. Use examples to demonstrate how to design prompts and test or discuss the effects of different prompt designs on the same task.
3. It is suggested to include websites that help humans build ChatGPT prompts, such as awesome-ChatGPT-prompt on GitHub, and provide readers with solutions on how to construct good prompts
