The authors presented a paper titled "A memory dependent analysis on permeation of non-Gaussian laser pulse through human skin". The paper brings an interesting contribution within the scope of the journal. However, there are some few comments that could be considered by the authors:

- There are few typo to be corrected along the text.
- The authors should explain about the novelty of their work in introduction.
- Figure 4 need axis labels.
- The results may be compared with available literature with more discussion about the obtained results.
