

# Review of: "Synthesis and Antibacterial Screening of Cefradine Schiff Bases and Their Metal Salts"

Nader Daneshvar

Potential competing interests: No potential competing interests to declare.

After careful study of the manuscript, I found it interesting, but it has some severe disadvantages in the characterization of the synthesized compound, where no spectrum is presented, and also, the purity of the derivatives is not known. So, I recommend the manuscript for publication after minor revision.

Comments:

FT-IR and NMR spectra of the synthesized derivatives must be put and assigned in the manuscript or supplementary information file.
