Potential competing interests: No potential competing interests to declare.

The work describes comparative study between PTIC and Baricitinib for the treatment of covid-19 patients.

The results are encouraging for PTIC use however following minor changes will further render the manuscript more informative

1. Please provide any ethical approval sought for the comparative study
2. Please provide the inclusion and exclusion criteria followed if any
3. Please provide the molecular weight of PTIC used in the study
4. Please provide the probable mechanism of how intramuscularly administered 1.5ml dose of PTIC showed the encouraging results by adding discussion.
