

Review of: "Determinants of Corporate Financial Performance in African Insurance Market"

Hang Thu Dang

Potential competing interests: No potential competing interests to declare.

1. Structure, form and presentation of the manuscript (in accordance with the regulations of the conference)

The structure, form and presentation of the manuscript somewhat accord with the regulations.

2. Abstract and keywords

The abstract need to provide specific details regarding the methodology, sample size, and data sources used in the study. Without this information, it becomes difficult to assess the validity and reliability of the findings.

3. Conceptual framework and literature review

Conceptual framework is justifiable.

In section 2.2. Empirical Review and Hypotheses Development: to ensure logical coherence and clarity in the content, the authors should establish an order for the research hypotheses. This order can help shape the structure of the paper and make the arguments more coherent in Section 5. Discussion

4. Methodology (Research design, data, analysis techniques/ tools ...)

Appropriate Methodology. However, in page 9 the authors write "The quantitative data obtained from the company will be analyzed using MS Office Excel application and SPSS, and will be interpreted in percentages, tables, and graphs" but the research data in the paper was analyzed using the Eviews software. Clarifying data processing methods in your research.

5. Results and Discussions

Results and Discussions is good. Present the research findings in the form of a table, avoiding direct copying from the results obtained using Eviews software. Additional tests for the research model (Multicollinearity test, variance inflation factor, autocorrelation)

Recommendation

_The paper needs to be edited. No requirement to reconsider by the reviewer.
