Potential competing interests: No potential competing interests to declare.

The title of this study clearly indicates the researchers' exploration focus. Considering the complexity of the issue, the authors have put in a dedicated effort to address it thoroughly. The article is well-executed overall; however, there are a few suggestions for potential improvements.

- The authors could improve the study by including insights from other participants, particularly participants 1, 2, and 3. The current emphasis is mainly on participants 4, 5, and 6, indicating a requirement for a broader range of perspectives.
- Please consider aligning the study with the Sustainable Development Goals (SDGs).
- Kindly incorporate a perspective on sexual and reproductive rights and justice in the discussion section to introduce a new avenue for exploration.
