Review of: "Visitor Capture Metrics: Research Note on a Six-year Correlation Analysis of Provincial Tourists and Museum Visitors"

Muhammad Irfan¹

1. Atacama Large Millimeter Submillimeter Array, Santiago, Chile

Overall, this manuscript is well-structured and effectively accomplishes the objectives of the study. The research is clearly articulated, supported by relevant literature, and presents meaningful insights into the subject matter. The methodology is sound, and the findings contribute to the broader discussion in the field. While the study is well-executed, minor refinements in clarity and depth could further enhance its impact.
