Potential competing interests: No potential competing interests to declare.

A good summary of Nursi's contribution to the Islamic epistemological framework with hardly any elaboration on each of the concepts explained. Pin-pointed references were also absent. It would have been helpful to delve more into Nursi's ideas about the proper role and function of 'aql (intellect) within the context of the pursuit of intellectual development and human progress. It would also be interesting to see how 'aql may contradict the Scriptures, and how Nursi dealt with such a predicament.
