Potential competing interests: No potential competing interests to declare.

1. What's your goal to write this article?
2. What is new in this paper?
3. Add more keywords; remember that the selected keywords should accurately reflect the content of your paper and be relevant to the research community interested in your topic.
4. Insert a short conclusion to the abstract ending.
5. In the Introduction section, it would be beneficial to incorporate a more comprehensive literature review that discusses recent publications in the field. This will not only help contextualize the current work but also provide an opportunity to identify any existing gaps or areas where the manuscript can contribute novelty. Strengthening the literature review in this manner will enhance the overall depth and significance of the paper.
6. Part 1.2. *Types and Functions of Efflux Pumps*, paraphrase: "Efflux pumps come in different shapes, sizes, and flavors. Okay, maybe not flavors, but you get the point."
7. However, I noticed that the tone of the paper is more informal than what is typically expected in academic writing. Consider using more formal language, and ensuring a consistent tone throughout the paper.
8. A visual representation can often clarify complex concepts, making it easier for readers to grasp the key points. A well-designed figure can amplify the impact of your findings and contribute to the overall visual appeal of the paper. Sometimes, a figure can convey information more efficiently than a lengthy description, contributing to the overall conciseness of your paper.
9. There are some old references, and the authors should present appropriate recent citations.
10. However, numerous necessary corrections are required to this manuscript - these relate to punctuation errors and editing.
11. Some future work could be described in the conclusion section.
