Page 2

It should include relevant references

All these statements should be supported by references

Page 4

Have you used statistical method to find sample size?

The finding can be presented in tables and graphs; in a better fashion.

Page 6

Graphical presentation would be better

Page 9

Instead of repeating the numbers or percentage, it is suggested to write the summary of each observation.

Page 11

Link these recommendations with findings. For example, which type of policy is to be developed and for what kind of gap, which support system for what kind of gap observed in study, etc. ?
