

Review of: "Analyzing the nexus between Spatial Data Infrastructure Development and e-Government"

Kamal Pandey

Potential competing interests: No potential competing interests to declare.

1. There is neither scientific or content in the paper. The paper also lacks the technical details of the implementation of SDI.
2. The links provided for the portal are only the basic google map link.
3. The references provided are outdated.
4. The recommendations and conclusions are very generic in nature. It can be improved by adding few specific problems faced in the country along with the solution proposed by the study.
