

Review of: "Impact of risk factor diabetes mellitus on patients with periodontitis"

rayhana malek

Potential competing interests: The author(s) declared that no potential competing interests exist.

Global remarks:

- The main objective of the article is not clear and not well established
- The article is not well structured, we suggest a plan like :

- definition of periodontitis
- definition of diabetes mellitus
- epidemiology
- pathogenesis of each one
- pathology and clinical aspects
- therapy

and highlight and detail more the bidirectional relationship between periodontitis and DM in each chapter

(epidemiology, pathogenesis therapy)

- The preventive protocol and therapeutic protocol for DM patient having periodontitis is not elaborated as mentioned on the abstract
