

Review of: "Acacia Pycnantha Gum Exudates Recognised as a Traditional Food in Two Countries May Have Economic Potential"

Rohazila Mohamad Hanafiah

Potential competing interests: No potential competing interests to declare.

The article doesn't have enough data to analyze. Authors can add the parameters to evaluate the content of Acacia pycnantha and its biological effects on microorganisms. The more beneficial the plant, the more economic potential can come out. Results and discussion too short. Add the same parameters to discuss more about this plant.
