Thank you for the review invitation, as the title itself is a unique and trending topic, I am happy to review the said title and I appreciate the authors' hard work and research contribution.

Introduction part

1. 3rd Paragraph "The types of..... discussed" citation is required as well as clarity in the paragraph is missing.
2. The article can be more improvised by adding recent and latest citations.
3. 16th paragraph "People have altruism" there are other's motivations and needs, for example experience points, time limit and etc., that can be analyzed, why limited needs have been taken?

Method

1. Which questionnaire has been used that has not been stated clearly in the study.
2. What sampling technique has been used?
3. How the sample size has been framed?
4. If Non-parametric test has been used, then why Pearson correlation has been taken, why not Spearman correlation not taken?

Practical and theoretical contribution can be added to strengthen the study.

Thank you and I hope my comments and review will strengthen the research article and my best wishes to the authors.
