Dear Dr. Gabriele Marinello

- This study lacks novelty and originality because there are many literature reviews on the same object and case study; therefore, I prefer to make a comparison between the literature review and this study and present the difference between them.
- Please, I prefer adding the map of the case study.
- Please change the Temperature unit from 0 C to °C and the hour to hr.
- Please give the definitions of the abbreviations HPI and HEI in the abstract.
- The tables and figures cited in this study are not found; please add them to the study.

My opinion on this study that should be not accepted unless making all the comments.

with regards

Dr. Rasha A.Al-husseiny
