Potential competing interests: No potential competing interests to declare.

A brave and enlightening piece of research, highlighting a fascinating subject area and opening the door for further studies in this area. The article is well-written and clearly presented. Perhaps a differentiation between the words 'religious' and 'spiritual' would enable the reader to have a clearer view of the findings. These terms are not synonymous as is suggested in certain areas of the text. I admire the research into different areas of religious groups, however, and look forward to further investigations by the authors.
