Potential competing interests: No potential competing interests to declare.

1. Could you further explain the methodology for risk of bias assessment and quality evaluation of the included studies?
2. Could you provide more information on any adverse effects or side effects observed in the studies included in your analysis?
3. Please elaborate on the key findings and implications of the comparison between copper nanoparticles and standard antiviral therapies.
4. Can you provide additional insights into the implications of your study's conclusions for clinical practice and future research in dermatology and viral skin infections?
5. Is there any additional information or updates regarding references that you would like to provide?
