Review of: "A Proposed Heuristic for Guessing Distributions"

Han-Ming Liu

Potential competing interests: No potential competing interests to declare.

For a bigger N, it is not simple to "Guesstimation", but it is still an available method. This study provides a valuable reference for related works. It is recommended to publish it after minor rivision. Some suggestions are as follow:

1. The layout of the equations is not very well, e.g., the i and m in Equation 4 should be subscripts.

2. Suggest to give the derivation of equation 5 and 6.
