

Review of: "The Key to Academic Equity: A Detailed Review of EdChat's Strategies"

Mayuresh Pardeshi

Potential competing interests: No potential competing interests to declare.

The article seems to be a discussion about a new publication model plan. Even though multiple claims are present, the following additions would be helpful to make it complete.

1. Describe the objectives clearly for EdChat model.
2. Present a flowchart that shows the publication process and its advantages.
3. Add a table to differentiate with multiple other publication models.
4. Provide a clear example of which type of articles are accessible and the related categories usage.
5. The model will be useful to the specific field of the domains? What are the ethics, rules, conditions necessary for the model's sustainability.

Best wishes ahead.
