

Review of: "Prospective Role of Chat GPT in the Military: According to ChatGPT"

Amit Verma

Potential competing interests: No potential competing interests to declare.

The author lists the areas in which ChatGPT can be used but does not dive deeper into any of the mentioned areas. The list is neither comprehensive nor does it have the details on how ChatGPT can be used for in these areas.

The author mentions that ChatGPT can be “trained” on data such as:

Sensor logs

Satellite imagery

Text summarization

Named Entity Recognition

Language Analysis

and more. It is important to note that as of June 2023, ChatGPT does not have any training APIs. It is also important to note that ChatGPT itself cannot be trained, since it is an implementation of a GPT model, and is an application that is powered by GPT models. The nomenclature ChatGPT is incorrect and should be changed to OpenAI models such as those listed in
