Potential competing interests: No potential competing interests to declare.

1. It seems that the title is not a novelty?
2. Considering that you stated the following in the abstract, what is the necessity of your study?

However, as has also been previously observed for organic pollutants, the group of meat and meat products is not being, at least in Asian countries, one of the most relevant food groups contributing to human dietary exposure to toxic metals and metalloids.

1. Add keywords to the article?
2. The introduction is written long, and it reduces the reader's attention and accuracy?
3. In the section: Analytical methods to measure metals/metalloids in meat and meat products, analysis methods should be explained?
4. The other parts are complete, but please explain about the concentration of these pollutants in the meat products of the Middle East countries.
