Review of: "Are Bidding Behaviors of Jeopardy! Gameshow Contestants Influenced by Gender/Sex?"

Ali Amin¹

1. University of Lahore, Pakistan

It's a good study; however, the following points need to be considered for further improvement:

1. Contribution and motivation of the study could be further strengthened in the introduction section.
2. The sample size needs to be elaborated. How many observations per year and the total number of observations used in the study.
3. A descriptive statistics table should be added.
4. Why has America been chosen for this study? Please justify.
