Review of: "Implications of Large Class Size on Effective Teaching and Learning in Nigerian Tertiary Institutions: Lecturers' Perception"

Dr. Indranil Saha[1]

1 Indian Council of Medical Research

The article needs following clarifications:

The manuscript is written nicely, however following clarifications are needed from authors end.

1. In which year the study was conducted? Please mention

2. Name the software used for statistical analysis.

3. "1.00 ≤ Mean ≤ 2.50 implies Positive Implication; 2.51 ≤ Mean ≤ 4.00 implies Negative Implication." – how it was decided? Any relevant reference?

4. Since the data were generated from Likert scale, it would have been better to represent in median and IQR. Otherwise, please provide the normality test value so as to go for mean and standard deviation.

5. Also please mention about the normality scores before undertaking parametric statistical tests like t test and ANOVA.
