

Review of: "Comparative Study Between the Efficacy of 4% Articaine Infiltration and 2% Lidocaine Nerve Block as Local Anesthetic Agents for Painful Dental Procedures in Children Aged 6-18 Years"

I. Anand Sherwood

Potential competing interests: No potential competing interests to declare.

In the Methodology section, I would like the authors to explain a little bit more about the Visual Analog Scale and how it was adapted for children, including what difficulties they face when using this scale with children.

The study can be recommended for publication with these minor modifications.
