

# Review of: "A Research Note on Natural Reclamation Processes that Support Mangrove Biodiversity Spheres: Sedimentation in Three Major River Deltas in Northwestern Luzon Using Aerial Imagery"

Liliana Betancurth<sup>1</sup>

<sup>1</sup> Universidad de Antioquia

**Potential competing interests:** No potential competing interests to declare.

The document is interesting and appropriate to show the geomorphologic delta changes (evolution) in recent time and the used satellite method utility. I wonder way you do not mention comparison with 2020 – 2023 images (?).

**Abstract:** add a bit more of result to better engage the reading.

**Introduction:** If possible add a couple of similar researches references to reinforce your research here or to compare, i.e. <https://www.redalyc.org/journal/430/43067845009/43067845009.pdf>

**Figure 1.** Minimize the general map (left size) and improve size of local map ( right side).

**Figures 2 and 3.** Please add reference of the figure (author)

**Methodology.** Consider a bit more detail about the use of 1979 maps and 2013 images to compare.

**Figure 4.** this must be before Results section

**Figures 5, 6, 7 and 8.** These must be after first paragraph of results.

**Figure 5.** It is one of the most significant result of the comparison, please try to make it bigger. Left image on top is very dark.

**Figure 6.** Text is too much big, please give significance to the map instead of text.

**Figure 14.** Please make the map bigger and text smaller.

**Conclusion.** It is complete and resume the results of the research.

**References.** Revise again if all references are included here.
