This is an interesting paper about « the Role of Nicotine in RAS and Fibrosis Linked to Severe COVID-19 Manifestations ». But, I had some doubts that I put to the author:

1. While the first part of this manuscript is well-developed, I think that the second one must be more developed to understand the links between nicotine and fibrosis in severe COVID19 manifestations
2. Language must be check-in by a native speaker
3. Some abbreviation mentioned in this paper didn't appear in the abbreviations' list. For example: MAS, ERK....
