Potential competing interests: No potential competing interests to declare.

The manuscript provides a multi-factor model of the spread of COVID-19 across the 58 counties of California from March 2020 to June 2023.

- The present manuscript appears to be a statistical report rather than research one.

In my opinion that author should rewrite it.

- The abstract should ideally be structured according to the standard format (Introduction, Methods, Results and Discussion). Provide a structured abstract, if possible, in order to fulfill the requirements of the journal.
- Please, check the journal guideline for writing the manuscript.
- Please, highlight the innovative component of the study.
- Please, assure that all figures are of the highest quality/resolution.
