# Dialister micraerophilus

National Cancer Institute

## Source

National Cancer Institute. *Dialister micraerophilus*. NCI Thesaurus. Code C122280.

A species of Gram-negative, non-motile, non-sporulating, rod-shaped bacteria in the family Veillonellaceae. *D. micraerophilus* is generally anaerobic but will also grow under microaerophilic conditions. It can be differentiated from other *Dialister* species by phenylalanine arylamidase activity and tyrosine arylamidase activity.
