Adult Botryoid-Type Embryonal Rhabdomyosarcoma

National Cancer Institute

Source

National Cancer Institute. *Adult Botryoid-Type Embryonal Rhabdomyosarcoma*. NCI Thesaurus. Code C36099.

A morphologic variant of embryonal rhabdomyosarcoma occurring in adults. The neoplasm arises from organs containing a mucosal epithelial surface. It is characterized by the formation of a cambium layer in the affected tissue and polypoid nodules with an abundant myxoid stroma.
