

Review of: "Association of Dementia and Patient Outcomes among COVID-19 Patients: A Multi-center Rétrospective Case-Control Study"

Oyinlola Oluwagbemiga

Potential competing interests: The author(s) declared that no potential competing interests exist.

Excellent article, however, what are some of the limitations encountered when conducting this retrospective case-control study with older adults with dementia, especially in a multi-centre study.

Also, are there any forms of issues hovering around ethics, capacity to consent and power dynamism when collecting information from the participants.

Thank you and best regards

Oluwagbemiga
